I am an Owner-Operator and I depend largely on the weather reports given on my XM radio. Reports I cannot get elsewhere. I pay for these services, I should be able to receive them, I do not feel the National Assoc of Broadcasters have the right to dictate to me what I can hear on my xm radio. I am asking the FCC to reject the NAB's petition 04-160 and support the ability for xm to provide the programming I need for my business.
